OUR STORY

INDIGO RIDGE HEMP COMPANY IS A SOUTH CAROLINA BASED FAMILY OWNED BUSINESS PROVIDING QUALITY FULL SPECTRUM CBD OIL BASED PRODUCTS FOR OUR CUSTOMERS.

ALL OF OUR HEMP IS GROWN ON OUR 2300 ACRE USDA CERTIFIED ORGANIC FARM LOCATED IN WESTERN SOUTH CAROLINA. WE ARE ABLE TO SOURCE OUR CBD OIL DIRECTLY FROM THE HEMP PLANTS ON OUR FARM. AT INDIGO RIDGE HEMP WE GUARANTEE THE QUALITY AND CONSISTENCY OF OUR PRODUCTS.

AT IRH WE ARE PROUD TO SAY THAT NEARLY EVERYTHING IS DEVELOPED, LOCALLY CULTIVATED, AND MANUFACTURED IN SOUTH CAROLINA. PROVIDING TRUSTED PRODUCTS TO OUR CUSTOMERS IS FIRST AND FOREMOST. WE STRIVE FOR PERFECTION---PLANT TO BODY.

IRH

THE FARM

On The Ridge in South Carolina, lies a 2,300-acre fourth generation USDA certified farm that produces organic fruit and vegetables for Whole Foods, Publix, Lowe's Foods and countless other small grocery stores across the South East. On this same farm, our farmers have grown certified organic Hemp plants for our whole plant CBD Extract using responsible farming practices. Indigo Ridge Hemp (IRH) has taken every measure to maintain the quality of our products.

By using vertical integration, we are able to apply a plant to shelf process using a hands-on approach. Everything is developed, locally cultivated, grown, manufactured and packaged in South Carolina.

IRH is a family owned and run company with traditional business principals.

As a permit holder in the SCDA Hemp Program, we grow USDA certified organic Hemp plants for our full spectrum CBD Oil products using responsible farming practices. Good Manufacturing Practices (GMP) and regenerative farming practices.

THE FARM: QUALITY & OUTPUT

Our 2019 growing capacity will increase 5x from the maximum allowed 20 acres in 2018 to 120 acres. We are a USDA organic certified farm and currently rank of one of the largest in the SE with the USDA organic certified badge who will be growing hemp in 2019.

Our 2019 grow places our output at around 250,000 USDA certified hemp plants. This gives us the ability to single source our CBD oil directly from our farm. 120 acres can produce approx. 5.8 million single 30mL (1 oz.) bottles at a 600mg dosage. IRH can keep cost down due to our scale. Many of our competitors are simply marketing experts that are white labeling hemp oil from unknown sources. We can tell you exactly which strain of hemp is in each bottle and where it was grown in the field, this is something that separates us from almost everyone.

We can also guarantee a clean finished product devoid of heavy metals and pesticides because we are grown on USDA certified soil. USDA organic certified soil must be constantly checked and monitored. We grow for many national clients such as Whole Foods, Publix and Lowe's Foods who already require stringent testing for our produce, and this same level of testing goes into our fields prior to growing our hemp. Hemp is a spectacular phytoremediator which means its roots can pull heavy metals, pesticides, herbicides, fungicides, radioactive elements and fuels from the soil. Understanding where your hemp is grown is paramount in ensuring finished product quality

THE EXTRACTOR

SC Botanicals, which is operated by director Chris Cortina, came from San Diego County's first licensed extractor Outco. Outco is one of Southern California's most respected extractors. Cortina has multiple years of experience in the cannabis industry and has an Agri-Business degree from Clemson. Cortina created a partnership with Dr. Allison Justice who has a PH. D in horticulture. Both Justice and Cortina worked together at Outco, Justice worked as the Vice President of cultivation and Cortina worked in quality assurance while at Outco. Both SC natives came back to their home once SC changed its hemp laws to allow for its cultivation. SC Botanicals utilizes a supercritical CO2 extraction process which is the cleanest form of extraction known. This is because this type of extraction uses CO2 in the extraction process and does not leave behind residual solvents like ethanol or butane. Our goal as a company is to always seek the highest quality level of extraction with the most qualified individuals. There are no other extraction facilities in South Carolina that can compare to SC Botanicals which is a GMP facility and is run by individuals with unparalleled expertise.

THE PRODUCT MANUFACTURER

We chose Earth's Creation as our product manufacturer because we were impressed with their facilities, reputation, and current product line. For over 25 years Earth's Creation USA has researched, developed, manufactured and marketed premium quality nutritional supplements as a leading natural health product provider in the domestic and international marketplace.

Quality control is of the utmost importance for the team at Earth's Creation USA. Their nutrition supplement products are produced in a GMP/FDA Registered facility. Each step of the way, the quality of Earth's Creation products is tested by a team of quality control technicians who monitor and document their findings.

IRH

THE MANUFACTURER FOR OUR TOPICALS

Our partnership with Bloem came about through a recommendation by highly respected individuals in the cannabis industry. Bloem is able to do advanced post-processing with CBD oil, and is capable of producing products such as CBD desolate & isolate. Currently, there are no other facilities in South Carolina capable of this. Bloem is a Missouri based GMP processor, manufacturer and distributor of hemp-derived phytocannabinoids and hemp extract products. They are a bulk and wholesale supplier of hemp extract oil in full spectrum, broad spectrum and isolate hemp extract (both with 0.0% THC) and products for human and animal wellness. Bloem was founded in 2017, but has been working in the cannabis industry since 2014 as medical cannabis consultants. Bloem helps cannabis entrepreneurs win licenses, optimize facility design, standardize operations, and maximize cannabis cultivation potential. Through their medical cannabis experience in addition to thorough research and testing, Bloem recognized the quality of CBD available on the market was inferior to what consumers could be enjoying. That's why we launched Bloem.

PRODUCTS: MUSCLE GEL

Indigo Ridge Hemp's muscle gel is a fast acting gel that cools and warms on contact with the addition of menthol and camphor oil. Our muscle gel also contains a vast array of penetrating oils that have been used for generations for relief. This gel has been specifically formulated using our full spectrum CO2 extracted organic hemp flowers to quickly absorb in the skin providing quick relief for muscle pain, inflammation and discomfort. This formula is created using 500mg full spectrum oil and is not made from CBD isolate so you will receive the same "full spectrum" benefits which aid in creating the "entourage effect." The entirety and purity of the hemp flowers remains in each jar guaranteeing the maximum health benefits every time you use our muscle gel. Apply this gel directly to problem areas on the skin and slowly increase the dose until you find the amount that works for you.

PRODUCTS: PAIN CREAM

Indigo Ridge Hemp's powerful pain cream is designed for long lasting targeted relief for muscle aches, cramps, arthritis, nerve pain and joint discomfort. This cream has been formulated with our full spectrum CO2 extracted organic hemp as well as vast array of all-natural medicinal ingredients. We utilize our full spectrum hemp oil derived directly from the hemp plant's flowering buds. The powerful combination of the healing properties of the hemp plant and the all-natural oils creates a perfect topical cream for daily use for long lasting relief. This cream is packed with 1000mg of CBD to ensure a potent dose for your aches and pains. This cream is made with full spectrum oil which is the highest quality and the most effective type of CBD oil. Many creams are made with isolated CBD oil and do not preserve the integrity of the entire plant. We preserve all the natural components of the plant including, its fats, lipids and terpenes providing all the healing benefits that mother nature intended. Apply this gel directly to problem areas on the skin and slowly increase the dose until you find the amount that works for you.

PRODUCTS: TINCTURES

Our full spectrum CBD oil extract contains the greatest concentration of phytonutrients from the flower bloom as well as the beneficial and naturally occurring compounds from the plant. We use a clean extraction process called super-critical CO2. Our cannabis oil is safely extracted without the use of chemical preservatives, thinning agents, artificial ingredients or corn syrup. We utilize only organic MCT oil and organic hemp extract in our tincture recipe without added preservatives or flavoring agents.

PRODUCTS: TINCTURES

1500mg THC Free “Broad Spectrum” Tincture: Our THC free broad spectrum tincture is unlike most THC free products on the market as it is not derived from CBD isolate and contains other minor cannabinoids such as CBN (Cannabinol) known for its sedative effects, anti-inflammatory properties, and pain-relieving capabilities. Our THC Free product has a non-detectable amount of THC which allows you to enjoy the benefits of CBD and other minor cannabinoids. Our THC free tincture also contains CBC (cannabichromine) which in some studies has shown to help improve brain function, improve acne, help with depression and potentially help deter tumor growth. Studies on CBC are in their infancy, but its potential medicinal benefits are very promising. As scientists and researchers are able to properly study this molecule and other minor cannabinoids its medicinal benefits will become further understood.

PRODUCTS: PET CBD

CBD helps promote wellness and balance by its interaction on the endocannabinoid system. Studies have shown that our body and our pets' bodies have built in receptors that rely on cannabinoids to send signals throughout the brain, the nervous system, and their organs. If your pet is cannabis deficient their body is unable to efficiently send proper signals. This system runs throughout the central and peripheral nervous systems and the brain. In short, CBD helps modulate signals sent by receptors that receive messages that help control pain, nausea and anxiety. By adding CBD (Cannabidiol) to your pets' regiment, you can help improve your pet's overall quality of life. Give Indigo Ridge Hemp TM CBD Pet Formula a try today, the most premium CBD oil for pets on the market.

OUR TESTING PROCESS

All of our products are 3rd party independent lab tested by labs with ISO 17025 for cannabinoid content and heavy metals. In our future line of products we are also testing for pesticides and terpene levels. We are able to test for any level of additional factors including microbiology, mycotoxins or anything else depending on what the client requires.
